To Whom It May Concern:

I am writing this note because I want to express how pleased I am with EZ STREET cold patch. As per our conversation, I am very excited about the results we have established using EZ Street.

EZ STREET is superior to any similar product that we have tried and with its ability to work in water, no tack coat required and not having to wait in long lines for hot mix saves us considerable time and money.

When I come back a month or so later to the utility cuts that have been patched with EZ STREET I cannot tell the difference between hot mix asphalt and EZ STREET. It has been holding up very well for us especially when it rains because I can save the headache of going back to the patches and replacing them like we used to with conventional cold mix. I am saving money by using EZ STREET in our utility cuts.

It is nice to have this new high performance cold mix available for our use any time of the year and to know the NYSDOT has approved it as a high performance patch material for state highway use.

Sincerely,

Anthony Martucci  
President
