Kellie,

It has been an eventful past few weeks. Not only has the City of Alameda been able to learn about the EZ Street product line, and rapid availability from SYAR Industries in Vallejo, CA, but we have had GREAT success utilizing the product on our city streets. Our general application ranges from simple potholes and fillets to turn key road resurface projects.

I must admit, I was a bit apprehensive regarding the use of a new product line in a brand new truck. One of my initial concerns was not knowing how well the product would be able to clean out of our new pothole trucks auger system.

Low and behold along with the generous help, and thorough product demonstration from Mike Wilson at SYAR Industries, we loaded approximately (.5) Ton into our hopper, crossed our fingers and activated the auger. Simply amazing. Not only was the EZ street product flowing out of our auger unit with less effort than Hot Mix A/C, the EZ street product cleaned all of the previously used hardened hot mix asphalt off of the auger, and off the walls of the trough. I could not believe my eyes. Typically we use a biodegradable citrus release mix. Well, thanks to EZ Street, all problems solved.

On behalf of the City of Alameda Public Works Department, we couldn't be more pleased.

Thank you again Kellie for the plethora of knowledge, and product support. We hope you enjoyed your visit to Alameda, viewing our train track overlay project, utilizing EZ Street.

Best Regards,

Ricardo De La Torre
